CONGRATULATIONS  
GRADUATES!

TIMOTHY MARSHALL VAUGHN  
CLASS OF 2000

I'd like to be the sort of friend that you have been to me;  
I'd like to be the help that you've been always glad to be;  
I'd like to mean as much to you each minute of the day  
As you have meant, old friend of mine, to me along the way.

I'd like to do the big things and the splendid things for you,  
To brush the gray from out your skies and leave them only blue;  
I'd like to say the kindly things that I so oft have heard,  
And feel that I could rouse your soul the way that mine you've stirred.

I'd like to give you back the joy that you have given me,  
Yet that were wishing you a need I hope will never be;  
I'd like to make you feel as rich as I, who travel on  
Undaunted in the darkest hours with you to lean upon.

The first part of the document discusses the importance of maintaining accurate records in a laboratory setting. It emphasizes the need for clear labeling and consistent data entry to ensure the reliability of experimental results. The author notes that many common errors, such as misreading scales or failing to calibrate equipment, can be avoided through careful attention to detail.

In the second section, the author describes a series of experiments conducted to test the effect of temperature on reaction rates. The results show a clear positive correlation between temperature and the rate of reaction, which is consistent with the Arrhenius equation. The data points are plotted on a graph, and a linear trend is observed when the natural logarithm of the rate constant is plotted against the inverse of temperature.

The third part of the document focuses on the safety protocols that must be followed in a laboratory. It highlights the importance of wearing appropriate personal protective equipment (PPE) and the correct handling of hazardous materials. The author provides a detailed checklist of safety procedures to ensure that all laboratory activities are conducted in a safe and controlled manner.

Finally, the document concludes with a discussion on the importance of scientific communication. It stresses the need for clear and concise reporting of experimental results, including the inclusion of error bars and a thorough discussion of the limitations of the study. The author encourages students to engage in peer review and to share their findings with the scientific community.
